

Mykonos Hires Software Security Veteran

Sales leader from the world's largest security software company to drive continued growth

Palo Alto, California - June 23, 2009 – Mykonos Software, a leading provider of Web application security, announced today that Jeffrey Klenner has joined the company as Vice President of Sales. Jeffrey brings more than a decade of experience in technology sales and sales leadership.

At Mykonos, Jeffrey will lead the company's growth in the Web application security market and develop a nationwide sales organization.

"We are thrilled to add an executive of Jeffrey's caliber to the Mykonos team," said David Koretz, President and CEO. "His track record of consistently achieving outsized results, coupled with his deep understanding of the security market makes him the perfect executive to achieve our business objectives."

Prior to joining Mykonos, Jeffrey was the Chief of Staff for the Chairman and CEO of Symantec, the world's largest security software company. Prior to that role, he was in sales and sales leadership roles at Symantec, EMC, Veritas, and Sun Microsystems.

"My experience in the security business has shown me how important it is to protect the application layer," said Jeffrey Klenner, Vice President of Sales. "I am looking forward to working with the Mykonos team to grow the business into a major force in the security space."

Jeffrey will be working for the company out of its new office in Silicon Valley, and will manage the Silicon Valley office.

About Mykonos

Mykonos is a new company created to solve the problem of Web application security. Mykonos compliments network-level security measures like Web application firewalls and code scanning, by adding fine-grained security that actively protects the application code and data. More information is available at www.MykonosSoftware.com.
